Hello Janette,

Please find attached, an answer to your inquiry regarding the chemical composition of the ore in the Class III Area. If you need further information, please inquire further.

Sincerely,

Ted Pagano

Ted,

I am working on the issue of monitoring parameters for the Class III Permit, and have a question. Do you know the chemical composition of the Potash that you will mine? Is it nearly pure KCl or are there other "potash" compoundss?

Thank you for any information that you can give me.

Janette
